

CSR Martini

Prime, MAB, MSB, Easy Baffle

Martini Prime is ideal for use in high performance acoustic partitions and ceiling systems. MAB is a multi-purpose insulation made to specific densities and thicknesses. MSB is an acoustic partition wall and ceiling insulation for commercial applications. Easy baffle is designed to fill ceiling voids between a concrete slab soffit and the top junction of a plasterboard partition.

Products/Ranges:	Prime, MAB, MSB, Easy Baffle
Product Stages Assessed:	Whole of life +re-use potential
Product Type:	Interior fitout fabric
CSI Masterformat:	09 8000 Acoustical Treatment
Licenced Site/s:	Ingleburn, NSW
Licence Number:	MAR:WI01:2022:PH
Licence Date:	06th April 2022
Valid To:	06th April 2025
Standard:	GGT International v4.0
Screening Date:	23rd February 2022
PHD URL:	www.globalgreentag.com/certificate/1472/

PHD Summary	Inventory Threshold:	Inventory Method:
Percentage Assessed: 100%	100ppm Product Level	Nested Materials

- GreenTag Banned List Compliant.
- Product Meets Optimisation requirements - No Red Light category ingredient.
- Meets WELL™ v1.0 Features 97: Material Transparency, Feature 4: VOC Reduction and, WELL™ v2.0 Features – X07: Material Transparency, X08: Material Optimisation, X06: VOC Restrictions.
- Meets USGBC LEED® v4.0 and v4.1 Rating System MR Credit: "Building Product Disclosure and Optimisation - Material Ingredients" - Option 1: Material Ingredient Reporting and Option 2 - International ACP - REACH Optimisation.
- No worker, user, and environmental exposure to Carcinogens, Mutagens, Reproductive Toxicant or Endocrine Disruptors.

Declared by:
Global GreenTag
International Pty Ltd

David Baggs
CEO
Verified compliant with:
ISO 14024 & ISO 17065

1.0 Scope

The Global GreenTag International (GGT) Product Health Declaration (PHD) has been designed to provide an additional level of service to the green product sector in facilitating an easier understanding of both the hazard and risks associated with any certified products, and is intended to indicate:

- Chemical hazards of both finished product and unique ingredients to a minimum level of 100ppm for final product throughout the product life cycle (including any VOC or other gaseous emissions);
- An assessment of exposure or risk associated with ingredient handling, product use, and disposal in relation to established mitigation and management processes;

It is not intended to assess:

- substances used or created during the manufacturing process unless they remain in the final product; or
- substances created after the product is delivered for end use (e.g., if the product unusually degrades, combusts or otherwise changes chemical composition).

GGT PHDs are only issued to products that have passed GGT Standards' certification requirements. The Level of Assessment (BronzeHEALTH, SilverHEALTH, GoldHEALTH or PlatinumHEALTH) of a PHD rating relates ONLY to a Human Health Toxicity Assessment and is declared separately and not equivalent to the overall Bronze, Silver Gold or Platinum Green Tag Certification Mark Tier Levels of LCARate.

1.2 Preparing a PHD

GGT PHDs are prepared in the format of a transparency document which utilizes Hazard Classifications from the UN Globally Harmonised System of Classification and Labelling of Chemicals (GHS). Hazard Classifications are then risk assessed with a focus on the In Use stage for an outcome of Certification. Assessments are undertaken by GGT Qualified Exemplar Global Lead Auditors and subsequently accepted for Certification by the GGT Program Director (also a Qualified Exemplar Global Lead Auditor) under the International Standard v4.0/4.1, Personal Products Standard v1.0/1.1, or Cleaning Products Standard v1.1/1.2 and above Program Rules.

1.3 External Peer Review

Every GGT PHD is independently peer-reviewed by an external Consultant Toxicologist and Member of the Australasian College of Toxicology & Risk Assessment.

2.0 Declaration of Ingredients

Where a manufacturer wishes recognition under a rating program that requires transparency of ingredients, such as LEED[®] v4.0 & v4.1, WELL[®] v1.0 & v2.0, Green Star[®], the following information is declared from the audit:

Colour	Ingredient Hazard Disclosure
Green	Level 4 The hazard level of this ingredient indicates that the ingredient has no toxic hazard statements with no identified health effects.
Yellow	Level 3 The hazard level of this ingredient indicates that the ingredient is mildly toxic and/or has short/medium term reversible health effects.
Orange	Level 2 The hazard level of this ingredient indicates that the ingredient is moderately toxic and/or with a moderate health effects.
Red	Level 1 The hazard level of this ingredient indicates that the ingredient is highly toxic with a potential for severe health effects.
Black	Level 0 The hazard level of this ingredient indicates that the ingredient is highly toxic with a potential for severe health effects and is banned from being detectable above trace amounts in the final product.
Grey	Grey Chemical Not able to be categorised due to lack of toxicity impact information.
Colour	Risk Assessment & In Use Health Assessment Outcome
Green	No Concerns The risk assessment outcomes for the hazard level and percentage of ingredient used in the product after risk assessment is considered highly unlikely and therefore without concerns.
Yellow	Human Health Comment The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered low with an unlikely potential risk.
Orange	Issue of Concern or Issue of Concern Minimised The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered low to high with a higher than unlikely potential for risk.
Red	Red Light Comment or Red Light Comment Minimised The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered low to extremely high with a moderate potential for risk.
Dark Red	Red Light Exclusion The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered medium to extremely high with a likely potential for risk.
Grey	Grey Chemical Not able to be categorised due to lack of toxicity impact information.
Black	Banned Ingredients Level 0 Hazard Level categorised chemicals such as Substances of Very High Concern in the International Standard v4.0/v4.1 and/or Petroleum, Parabens plus a wide range of additional compounds stipulated by the Personal Products Standard v1.0/1.1 and Cleaning Products Standard v1.1/1.2

Global GreenTag International Pty Ltd (Global GreenTag) is not a medical professional organisation. Global GreenTag does not purport to provide medical advice, and makes no warranty, representation, or guarantee regarding the declaration that it provides in relation to any allergies, chemical sensitivities or any other medical condition, nor does Global GreenTag assume any liability whatsoever arising out of the application or use of any product or piece of equipment that has been chemically assessed by Global GreenTag.

The chemical assessments carried out provide transparent information peer reviewed by a consultant toxicologist regarding the chemical make-up and ingredients of certain materials and products, but such assessments are not to be taken as any form of medical assessment or health advice and are not targeted towards providing specific solutions to allergenic conditions or any other type of medical concerns.

Users must carry out their own investigations if they are concerned about specific medical conditions and the impact of certain products or ingredients in relation to specific medical concerns.

Global GreenTag takes no responsibility and is not liable in any way with respect to any medical or health issues arising from a person's use of materials or products that have been chemically assessed by Global GreenTag. Global GreenTag shall not be liable for any direct, indirect, punitive, incidental, special or consequential damages to property or life whatsoever, arising out of or connected with the use or misuse of any materials or products that have been assessed by Global GreenTag.

Ingredient Name	CAS Number OR Function	Proportion in finished product	GHS, IARC & Endocrine Category	REACH Compliance	Ingredient Assessment	Whole Of Life Assessment	In Use Health Assessment	Comment
Material: Low Melt Fibre								
Polyester	Fibre	40-50%	None	Ok				Recycled Content: None Nanomaterials: Unknown
Polyester copolymer	Copolymer	40-50%	None	Ok				Recycled Content: None Nanomaterials: Unknown
Material: Recycled Polyester Fibre								
Polyester	Fibre	60-75%	None	Ok				Recycled Content: Post-I Nanomaterials: Unknown
Material: Recycled Polyester Fibre Regen								
Polyester	Fibre	60-75%	None	Ok				Recycled Content: Post-I Nanomaterials: Unknown
Antimony triacetate	6923-52-0	0.02-0.03%	H302 (Acute Tox. 4), H315 (Skin Irrit. 2), H319 (Eye Irrit. 2), H332 (Acute Tox. 4), H411 (Aquatic Chronic 2)	OK				Antimony triacetate may cause skin and eye irritation if contacted. However, the manufacturer of the product operates under an Occupational Health and Safety System and therefore risks are considered low at the manufacturing stage. The substance is bounded in the final product, the hazards will not present in the final product. Therefore, it is not expected to cause harm to the users. Recycled Content: Unknown Nanomaterials: Unknown
Titanium dioxide	13463-67-7	0.3-0.37%	H351 (Carc. 2)	Ok				Titanium dioxide may cause cancer if contacted. However, the manufacturer of the product operates under an Occupational Health and Safety System and therefore risks are considered low at the manufacturing stage. The substance is embedded into the final product, the hazards will not present in the final product. Therefore, it is not expected to cause harm to the users. Recycled Content: Unknown Nanomaterials: Unknown
Proprietary	Finish Oil	0.18-0.23%	*	OK				Unknown substance is used. However, as there is no hazard declared, it is not expected to cause any harm to the users. Recycled Content: Unknown Nanomaterials: Unknown
Material: Virgin Polyester Fibre								
Polyester	White Fibre	40-50%	None	Ok				Recycled Content: None Nanomaterials: Unknown
Material: Virgin Polyester Fibre								

Polyester	Fibre	12-15%	None	Ok				Recycled Content: None Nanomaterials: unknown
Proprietary	Catalyst, Delustre	0.36-0.45%	*	Ok				Unknown substance is used. However, as there is no hazard declared, it is not expected to cause any harm to the users. Recycled Content: Unknown Nanomaterials: Unknown

* No GHS H-Statement classification

Comments:

VOC emissions: TVOC mg/m2/hr for final product is <0.5 mg/m2/hr. Threshold Limit Value (TLV) measured using Test Method ASTM D5116-2017 "Standard Guide for Small-Scale Environmental Chamber Determinations of Organic Emissions from Indoor Material/Products". Sample tested in February 2018 by FORAY Laboratories – NATA Accreditation 1231. Global GreenTag International Program Standard v4.0 Textile and Insulation Supplementary Standard is in accordance with requirements of the Green Building Council of Australia, New Zealand Green Building Council and LEED v4, as updated from time to time.
