

GLOBAL GREENTAG INTERNATIONAL PRODUCT ASSESSMENT TEAM

ABRISHAM VINCENT **Product Assessor**

Abrisham holds a Bachelor of Environmental Science from the Southern Cross University in Australia, providing him with the necessary scientific skillset to approach research using both quantitative and qualitative methodologies to further our understanding of how the built-environment impacts human health and healing.

Abrisham is constantly seeking to explain in ever more detail the connections between built-environment and human well-being. This has led him to collaborate over 6 months with Doctor Natalia Olszewska a researcher and practitioner in Neuroscience Applied to Architectural Design on the themes of trauma, healing and built-environment, which is becoming ever more relevant in this age of the Anthropocene.

Abrisham is an out-of-the-box thinker fronting up to complex problems by drawing from both an artistic and scientific mindset which enables his perspective to remain flexible and open to others and therefore drive positive change across social networks.

As a qualified Exemplar Global Environmental Management Systems Lead Auditor, Abrisham sees eco-labelling as a crucial point in building healthier built-environments for both human and non-human communities because it verifies who is being honest in their conduct and rewards those companies with greater consumer confidence that their products are not simply green-washed marketing ploys.

Community and environment are both of great importance to Abrisham and he sees environmental challenges as not distinct from social challenges but interdependent. He is both grateful and excited to be working among the Global GreenTag team as a Researcher & Product Assessor in a team which helps companies step ahead of their competitors through certifying their products Environmental, Social and Governance achievements.

GLOBAL GREENTAG INTERNATIONAL

Global GreenTag™ International Pty Ltd assesses products for all aspects of impacts on human health, ethical labour supply and the environment. The company was established in 2010 as a third party verified Conformance Conformity Assessment Body that conducts the award winning Global GreenTagCert™ certification program, and a third party, multi-criteria, consensus based and externally verified Type 1 Ecolabelling Program that complies and operates under strict International Standards.

Global GreenTag websites and all marketing collateral for every product certified by Global GreenTag are verified as 'fit for purpose' and compliant with ISO 14021. What's more, Global GreenTag's governance and its own external verification and certification is set against standards such as ISO 14024 (Ecolabelling), ISO 17065 (Conformance Assessment) and ISO 9001 (Quality Management) among others.

Voted one of the Top 100 Most Trusted Brands in Australia for 3 years running, Global GreenTag currently has more than 16,000 products in certification by over 230 manufacturers with factories in more than 20 countries. Global GreenTag™ certified products are determined as healthy for use using the best science available, with the results being peer reviewed by highly qualified, external consultant Toxicologists.
