Attention: Global GreenTag Clients

Global GreenTag International exists to improve sustainability. We commit to third party assessing, auditing and verifying the accuracy of sustainability claims. We do this to prevent greenwashing and promote a fair and balanced market. Our certificates make it easier to select products that improve sustainability.

Because we are always looking to improve, we have decided on a change. Removing all listed credits from our LCARate, GreenRate and Best Environmental Practice PVC (BEPPVC) certificates. This does not impact our recognition in the major building rating tools. Our reason is because we are improving. We have a new system in development and felt it was time to start the change.

This new system is a more dynamic credit verification system. We want to make it easier for Global GreenTag certificates to take priority on projects. We'll get this done through a strategic process of continual development with green building rating tools. This system will roll out over the next months into the new year. We are sure it will be both a profitable and educational experience for all our clients.

We invite further questions on this. Please send them to admin@globalgreentag.com.
